Lab 2

Installing Ubuntu Desktop

Momik Shrestha 2080-2069

Install Ubuntu desktop

- ISO used: Ubuntu desktop 22
- Hypervisor: Virtual Box 7.0

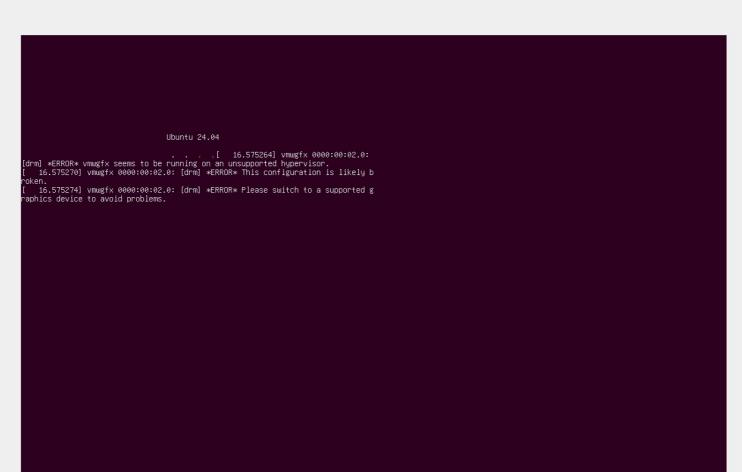

Steps:

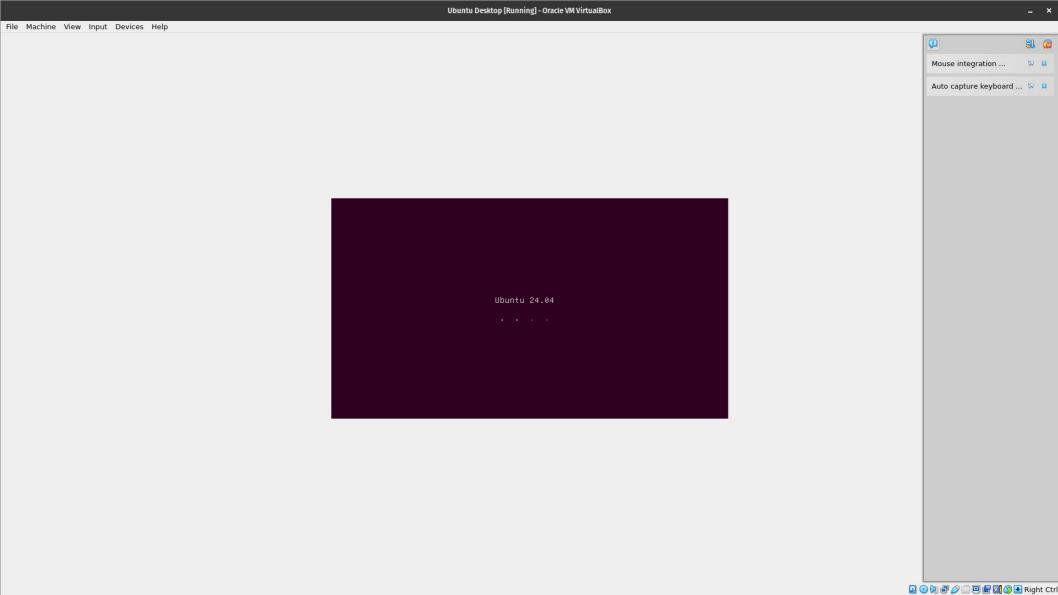

- 1) Create VM: Open VirtualBox, click New, name it, select "Linux" and "Ubuntu (64-bit)".
- 2) Allocate Memory: Set RAM to 2 GB (2048 MB) or more.
- 3) Create Disk: Choose Create virtual hard disk now, VDI, Dynamically allocated, and set size.
- 4) Configure Storage: Go to Settings, in Storage, add the Ubuntu Server ISO to the optical drive.
- 5) Start VM: Click Start to boot from the ISO.
- 6) Install Ubuntu: Follow on-screen installation prompts.
- 7) Finalize: Remove ISO, reboot, and log in.

GNU GRUB version 2.12

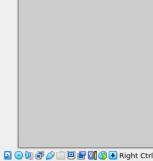

Try or Install Ubuntu
Ubuntu (safe graphics)
Test memory

Use the f and \$\pm\$ keys to select which entry is highlighted.
Press enter to boot the selected 0S, 'e' to edit the commands before booting or 'c' for a command-line.
The highlighted entry will be executed automatically in 2s.
